CAVRO MAGNI FLEX

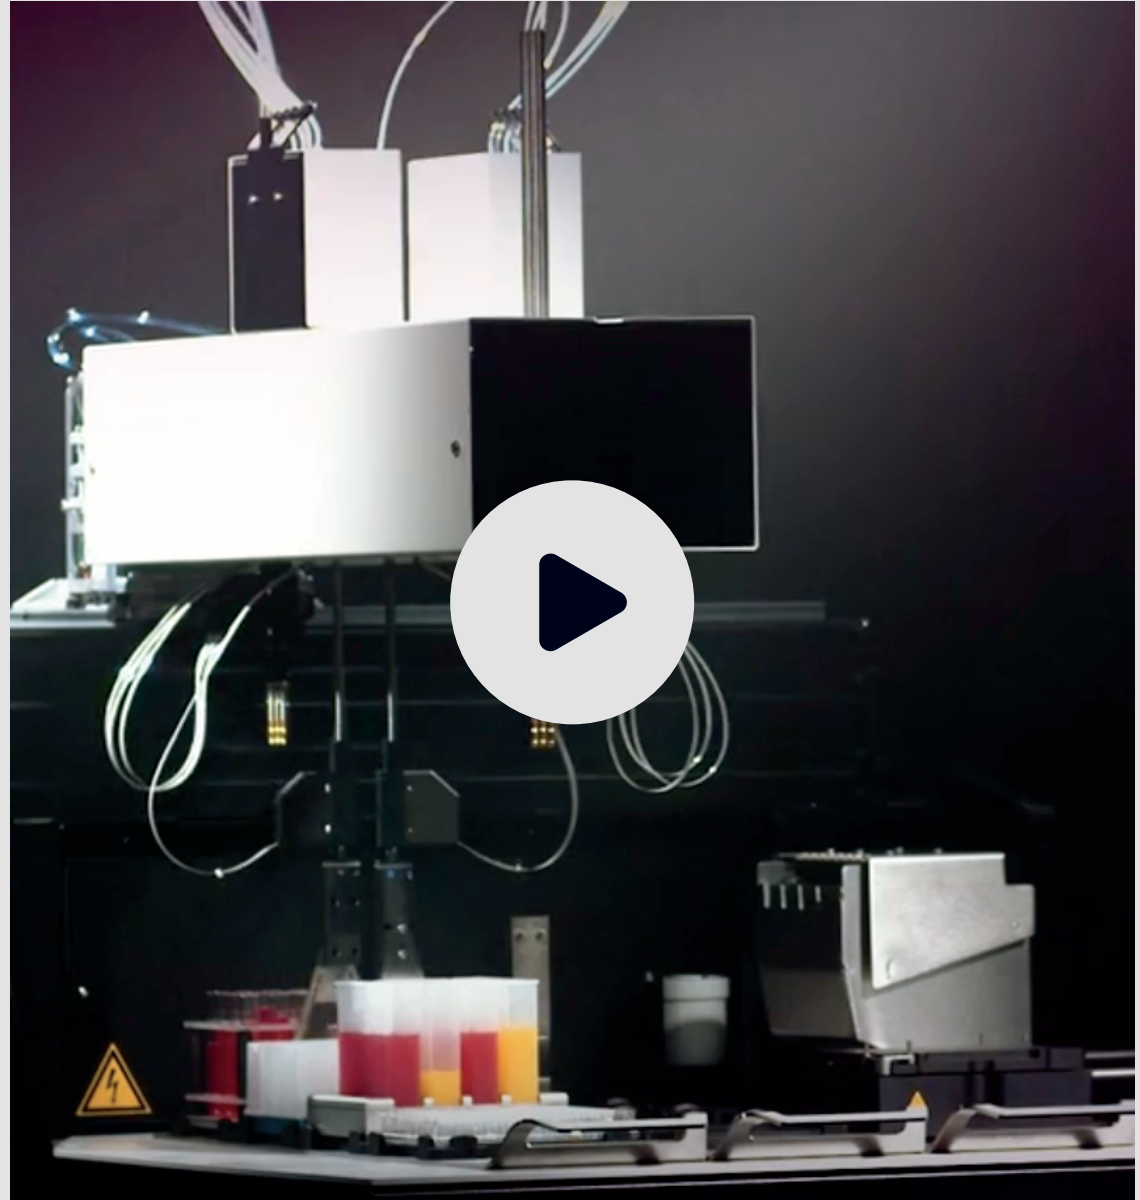

Automated liquid handling development platform - Cavro Air Restriction Pipettor (ARP)

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the Cavro Air Restriction Pipettor (ARP).

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the Magni Flex's channel gripper feature.

CAVRO MAGNI FLEX AUTOMATED LIQUID HANDLING DEVELOPMENT PLATFORM - CAVRO PULSSAR PBC (PISTON) PUMP

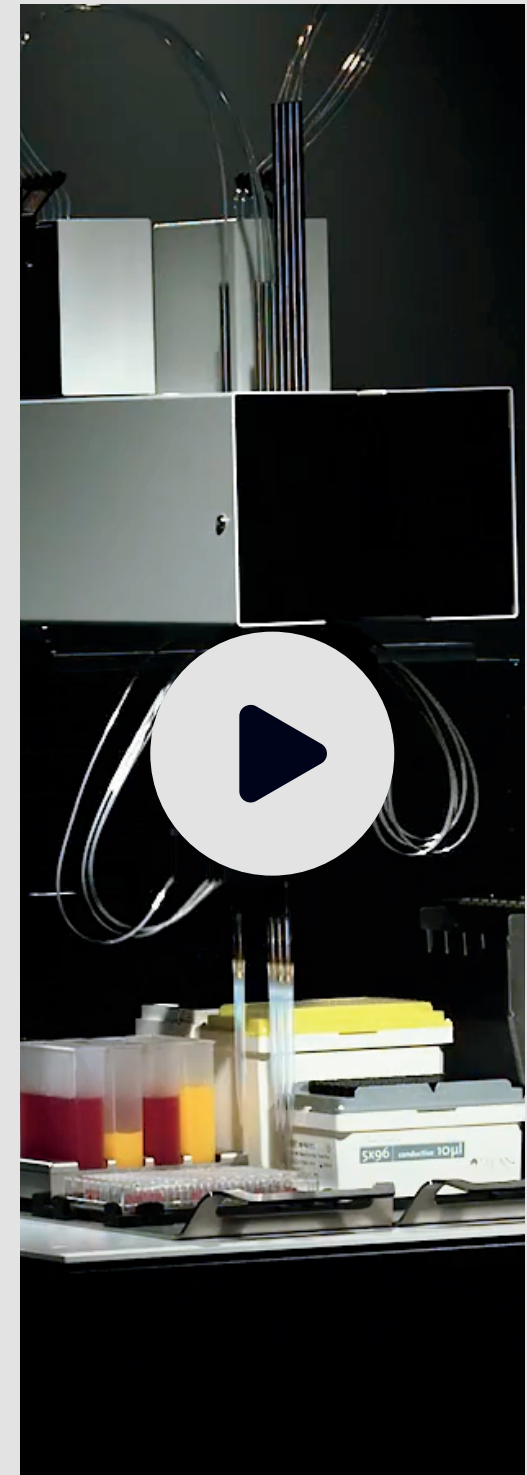

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the Cavro Pulssar PBC Pump.

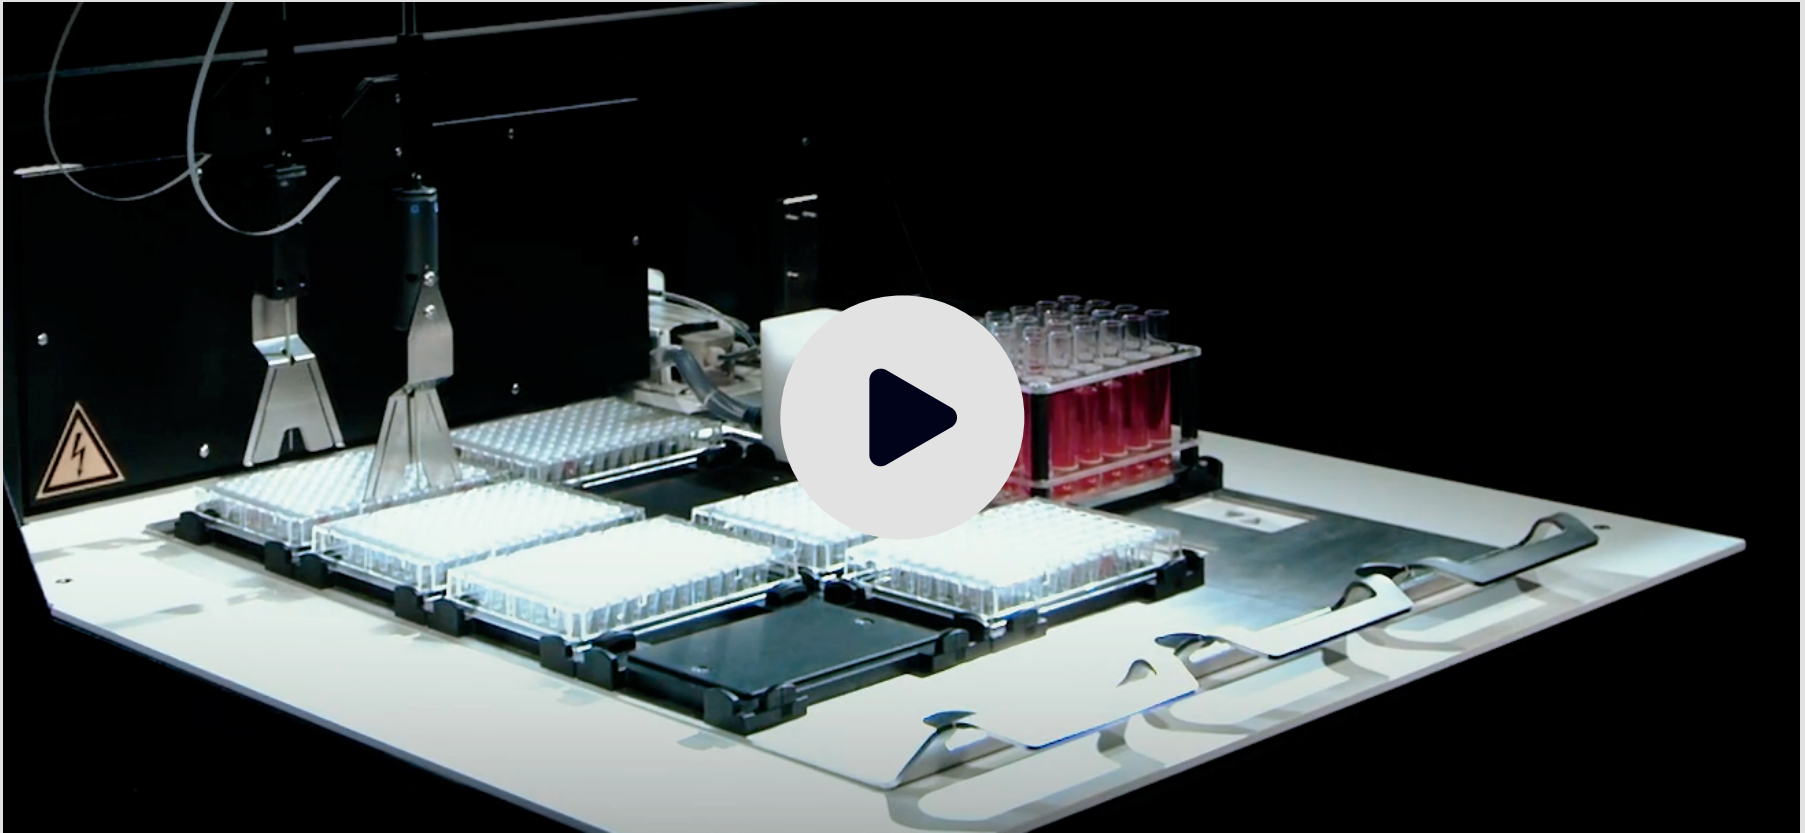

CAVRO MAGNI FLEX AUTOMATED LIQUID HANDLING DEVELOPMENT PLATFORM – INDEPENDENT CHANNELS

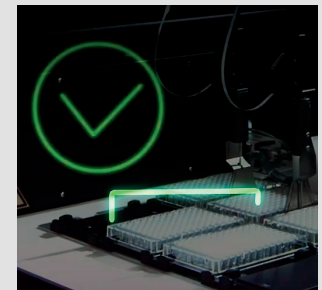

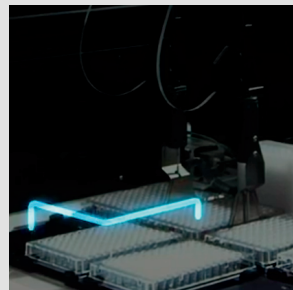

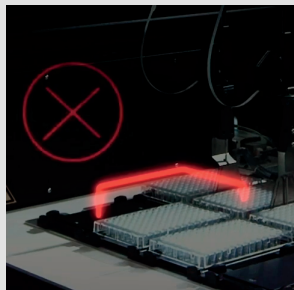

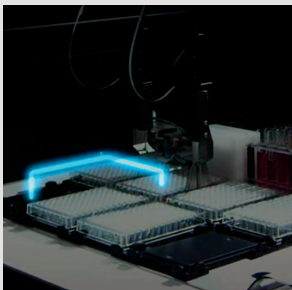

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the Magni Flex's Independent Channels.

CAVRO MAGNI FLEX AUTOMATED LIQUID HANDLING DEVELOPMENT PLATFORM – COLLISION AVOIDANCE

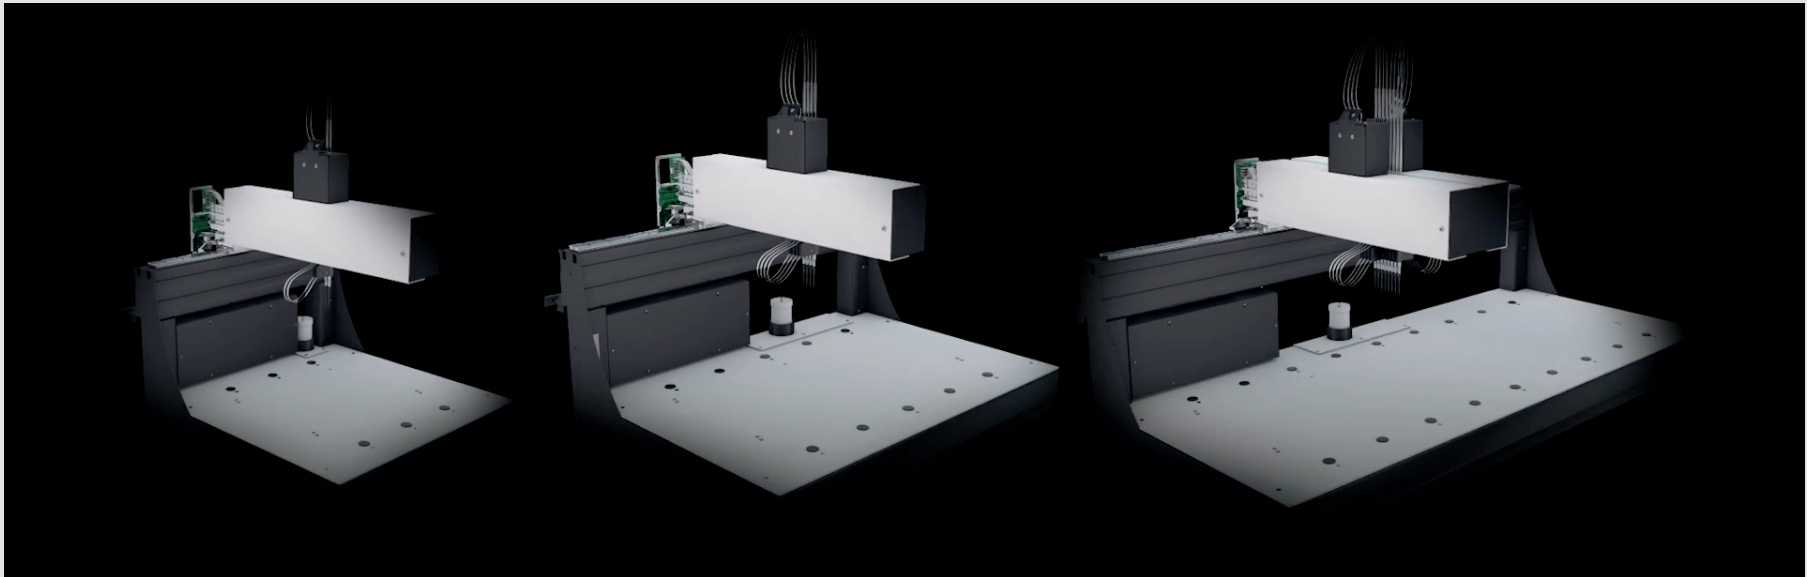

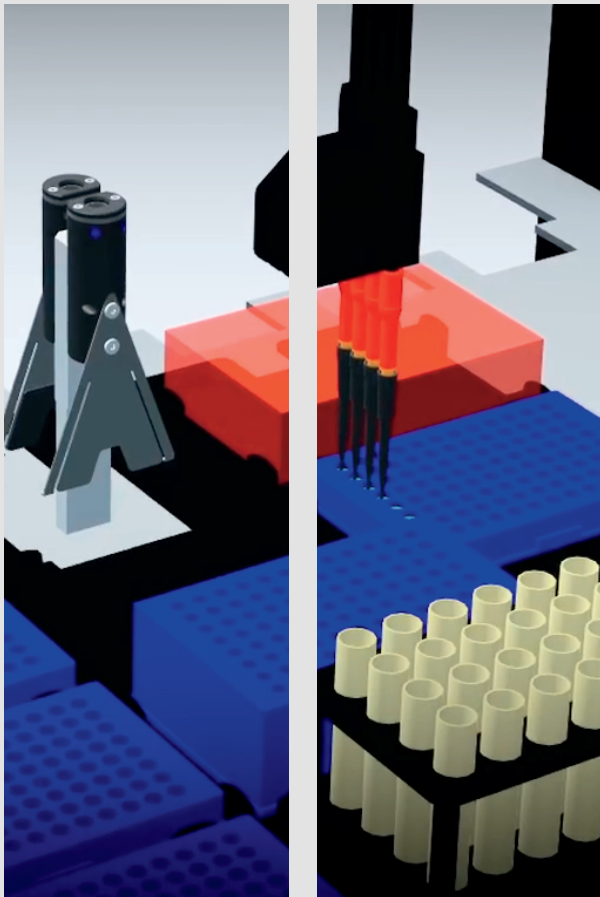

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the Magni Flex's Collision Avoidance feature.

CAVRO MAGNI FLEX AUTOMATED LIQUID HANDLING DEVELOPMENT PLATFORM – SCALABLE WORKDECK

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the scalability of the workdeck.

The Cavro Magni Flex is packed with features intended for seamless integration into most instruments. Its low to medium throughput, modular and scalable platform design offers flexible integration of liquid handling capabilities to meet various application needs. This video showcases the MAPlinx robust development software.
